Hydro Primer is a high tech 1k water borne polyurethane primer surfacer that rivals or surpasses the performance of conventional 2k urethane primers. Listed below are some of the many benefits of Hydro Prime.

1. Excellent adhesion even to bare metal.
2. Outstanding flexibility.
3. Good build.
4. Fast dry time. Can be sanded in one hour or less depending on temperature and humidity. Will not load or clog your sandpaper.
5. No catalyst required.
6. Excellent solvent resistance for better holdout.
7. No waste. Unused portion can be returned to original container.
8. Fast, economical and easy cleanup. Cleans up with tap water followed by small amount of solvent.
9. Dries to a smooth film requiring less sanding.
10. 1.9 V.O.C.
11. Unlimited pot life.
12. Excellent corrosion resistance.
13. Can be used as a 1k sealer with outstanding chemical resistances.
14. Ready for use, No additions required
