IMPACT RESISTANT COATING ssp11000

Clear Protective Coating

Product Description

Impact Resistant Coating is resilient and durable clear coating designed to repel stones and other road debris that could damage the finish of your vehicle.

Products

Impact Resistant Coating component A

Impact Resistant Coating component B

Surface Preparation

Sand cured paint or OEM finishes with 600 grit sandpaper or a grey scuff pad then wipe clean with wax and grease remover.

If applying over freshly applied basecoat allow proper flash time per base coat manufacture's recommendation.

Mixing Directions

Mix 1 part Impact Resistant Coating component A with 1 part Impact Resistant Coating component B. Mix thoroughly before applying. It is imperative that equal parts of Impact Resistant Coating are measured out.

Application Directions

Number of coats	2-3 Coats
Application density	Medium-wet to wet
Overlap	50%

Pot Life

When container is closed or covered pot life is 1 hour at 77 Degrees F. after mixing.

Additives

No additives are recommended.

Clean Up

Clean spray equipment immediately with gun wash solvent, thinner or urethane reducer.
